Journal of Photochemistry and Photobiology B: Biology 34 (1996) 245–248

Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY B:BIOLOGY

Subject Index of Volume 34

Absorption spectrum
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Acetoxy-tetrakis-(β-methoxyethyl)-porphycene
9-Acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67
5-Aminolevulinic acid
Photodynamic therapy: a promising new modality for the treatment of cancer, 3
pharmacokinetics of 5-aminolevulinic-acid-induced porphyrins in tumour-bearing mice, 13
chemical instability of 5-aminolevulinic acid used in the fluorescence diagnosis of bladder tumours, 143
Angelicin
photobiological properties of a new tetramethylfuroquinolinone, 159
Arabidopsis thaliana
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87
Argon laser
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
ATMPn
9-acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67

Benzochlorin
purpurins and benzochlorins as sensitizers for photodynamic therapy, 109
Betaine
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
Biofilms
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
Bladder tumours
chemical instability of 5-aminolevulinic acid used in the fluorescence diagnosis of bladder tumours, 143
Blepharisma
the photoreceptor pigment of the unicellular organism *Blepharisma* generates hydroxyl radicals, 29
Blepharismin
the photoreceptor pigment of the unicellular organism *Blepharisma* generates hydroxyl radicals, 29

Ca^{2+} uptake
changes in calcium transport in mammalian sperm mitochondria and plasma membrane irradiated at 633 nm (HeNe laser), 117

Elsevier Science S.A.

Cancer
Photodynamic therapy: a promising new modality for the treatment of cancer, 3
chemical instability of 5-aminolevulinic acid used in the fluorescence diagnosis of bladder tumours, 143
Chemical instability
chemical instability of 5-aminolevulinic acid used in the fluorescence diagnosis of bladder tumours, 143
Chlorococcum littorale
photosynthesis and hydrogen evolution under stress conditions in a CO_2-tolerant marine green alga, *Chlorococcum littorale*, 59
Chlorophyll fluorescence quenching
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87
Chlorpromazine
chlorpromazine, a candidate drug for photopheresis, 217
photopheresis; the risk of photoallergy, 225
Confocal laser scan microscopy
9-acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67
Confocal microscopy
microspectrofluorometry, fluorescence imaging and confocal microscopy of an endogenous pigment of the marine ciliate *Fabrea salina*, 183
Contact hypersensitivity
chlorpromazine, a candidate drug for photopheresis, 217

Digitonine treated sperm cells
changes in calcium transport in mammalian sperm mitochondria and plasma membrane irradiated at 633 nm (HeNe laser), 117
DNA
photobiological properties of a new tetramethylfuroquinolinone, 159
DNA damage
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
DNA oxidation
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
Dunaliella salina
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21

Electron microscopy
selective photosensitization of mitochondria by the lipophilic cationic porphyrin POR10, 191
Etiolated sprouts
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
Extracorporeal photochemotherapy
chlorpromazine, a candidate drug for photopheresis, 217
photopheresis; the risk of photoallergy, 225

Fabrea salina
microspectrofluorometry, fluorescence imaging and confocal microscopy of an endogenous pigment of the marine ciliate *Fabrea salina*, 183
Fatty acid hydroperoxide
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
Flow cytometry analysis
9-acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67
Fluorescence
fluorescence properties of protonated and unprotonated Schiff bases of retinal at room temperature, 39
9-acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67
purpurins and benzochlorins as sensitizers for photodynamic therapy, 109
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
red-shifted fluorescence from polyguanylic acid in aqueous solution at room temperature, 211
Fluorescence diagnosis
pharmacokinetics of 5-aminolevulinic-acid-induced porphyrins in tumour-bearing mice, 13
chemical instability of 5-aminolevulinic acid used in the fluorescence diagnosis of bladder tumours, 143
Fluorescence excitation spectra
red-shifted fluorescence from polyguanylic acid in aqueous solution at room temperature, 211
Fluorescence imaging
microspectrofluorometry, fluorescence imaging and confocal microscopy of an endogenous pigment of the marine ciliate *Fabrea salina*, 183
Fluorochrome primulin
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129

Grana Lamellae
differences in UV-B sensitivity between PSII from grana lamellae and stroma lamellae, 35
Guanine cations
red-shifted fluorescence from polyguanylic acid in aqueous solution at room temperature, 211

Heat stress
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
HeLa cells
photobiological properties of a new tetramethylfuroquinolinone, 159
Hemin
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
Hemoglobin
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
HeNe laser
changes in calcium transport in mammalian sperm mitochondria and plasma membrane irradiated at 633 nm (HeNe laser), 117
increase in cytosolic and mitochondrial protein synthesis in rat hepatocytes irradiated in vitro by He–Ne laser, 197
Hydrogen evolution
photosynthesis and hydrogen evolution under stress conditions in a CO_2-tolerant marine green alga, *Chlorococcum littorale*, 59
Hydroxyl radicals
the photoreceptor pigment of the unicellular organism *Blepharisma* generates hydroxyl radicals, 29
Hypericin
sensitization of photohemolysis by hypericin and Photofrin, 169

Infections
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
Inhibition
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
Intracellular pH
intracellular pH does not affect drug extrusion by P-glycoprotein, 177
Isolated hepatocytes
increase in cytosolic and mitochondrial protein synthesis in rat hepatocytes irradiated in vitro by He–Ne laser, 197

Kinetic analysis
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73

Lipid peroxidation
studies on *p*-nitroacetophenone-sensitized lipid peroxidation, 47
Lipid photoperoxidation
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129
Lipophilic and hydrophilic porphyrins
selective photosensitization of mitochondria by the lipophilic cationic porphyrin POR10, 191

Malondialdehydes
studies on *p*-nitroacetophenone-sensitized lipid peroxidation, 47
Mammalian cells
photobiological properties of a new tetramethylfuroquinolinone, 159
8-Methoxypsoralen
chlorpromazine, a candidate drug for photopheresis, 217
Microspectrofluorometry
microspectrofluorometry, fluorescence imaging and confocal microscopy of an endogenous pigment of the marine ciliate *Fabrea salina*, 183
Mitochondria of HeLa cells
selective photosensitization of mitochondria by the lipophilic cationic porphyrin POR10, 191
Multidrug resistance
intracellular pH does not affect drug extrusion by P-glycoprotein, 177

N-(2-hydroxypropyl)methacrylamide copolymer
photodynamic crosslinking of proteins. I. Model studies using histidine- and lysine-containing *N*-(2-hydroxypropyl)methacrylamide copolymers, 203

Ochromonas danica
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21
Oxazolone
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
8-Oxoguanine
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
Oxygen evolution
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21

PAM fluorescence
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21
P-glycoprotein
intracellular pH does not affect drug extrusion by P-glycoprotein, 177
Pharmacokinetics
pharmacokinetics of 5-aminolevulinic-acid-induced porphyrins in tumour-bearing mice, 13
Photoacoustic
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
Photoallergy
photopheresis; the risk of photoallergy, 225
Photobinding
chlorpromazine, a candidate drug for photopheresis, 217
Photochemistry
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
Photocrosslinking
photodynamic crosslinking of proteins. I. Model studies using histidine- and lysine-containing *N*-(2-hydroxypropyl)methacrylamide copolymers, 203
Photodynamic effect
selective photosensitization of mitochondria by the lipophilic cationic porphyrin POR10, 191
Photodynamic therapy
Photodynamic therapy: a promising new modality for the treatment of cancer, 3
pharmacokinetics of 5-aminolevulinic-acid-induced porphyrins in tumour-bearing mice, 13
9-acetoxy-2,7,12,17-tetrakis-(β-methoxyethyl)-porphycene (ATMPn), a novel photosensitizer for photodynamic therapy: uptake kinetics and intracellular localization, 67
purpurins and benzochlorins as sensitizers for photodynamic therapy, 109
photodynamic crosslinking of proteins. I. Model studies using histidine- and lysine-containing *N*-(2-hydroxypropyl)methacrylamide copolymers, 203
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Photofrin®
Photodynamic therapy: a promising new modality for the treatment of cancer, 3
sensitization of photohemolysis by hypericin and Photofrin, 169
Photohemolysis
sensitization of photohemolysis by hypericin and Photofrin, 169
Photoimmunology
chlorpromazine, a candidate drug for photopheresis, 217
photopheresis; the risk of photoallergy, 225
Photoinactivation
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129
Photoinhibition
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87
Photopharmacology
chlorpromazine, a candidate drug for photopheresis, 217
photopheresis; the risk of photoallergy, 225
Photopheresis
chlorpromazine, a candidate drug for photopheresis, 217
photopheresis; the risk of photoallergy, 225
Photoreceptor
the photoreceptor pigment of the unicellular organism *Blepharisma* generates hydroxyl radicals, 29
Photosensitization
evidence that certain phototoxic drugs photosensitize urocanic acid isomerization, 63
sensitization of photohemolysis by hypericin and Photofrin, 169
photodynamic crosslinking of proteins. I. Model studies using histidine- and lysine-containing *N*-(2-hydroxypropyl)methacrylamide copolymers, 203
photosensitized
inhibitory effect of ethyl oleate hydroperoxide and alcohol in photosensitized oxidative DNA damage, 51
Photosensitizers
photodynamic therapy: a promising new modality for the treatment of cancer, 3
purpurins and benzochlorins as sensitizers for photodynamic therapy, 109
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Photosynthesis
photosynthesis and hydrogen evolution under stress conditions in a CO_2-tolerant marine green alga, *Chlorococcum littorale*, 59
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
Photosystem II
differences in UV-B sensitivity between PSII from grana lamellae and stroma lamellae, 35
Phototoxic drugs
evidence that certain phototoxic drugs photosensitize urocanic acid isomerization, 63
Phthalocyanine
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Phycocyanobilin
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73
Phytochrome A
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
Phytochrome intermediates
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73
Phytochromobilin
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73
Pichia pastoris
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73
Plasma membrane vesicles
changes in calcium transport in mammalian sperm mitochondria and plasma membrane irradiated at 633 nm (HeNe laser), 117
p-Nitroacetophenone
studies on *p*-nitroacetophenone-sensitized lipid peroxidation, 47
Polyguanylic acid
red-shifted fluorescence from polyguanylic acid in aqueous solution at room temperature, 211
Porphyrin
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129
Porphyromonas
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
Prevotella
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123

Protein synthesis
increase in cytosolic and mitochondrial protein synthesis in rat hepatocytes irradiated in vitro by He–Ne laser, 197
Protonated Schiff base
fluorescence properties of protonated and unprotonated Schiff bases of retinal at room temperature, 39
Protonation
red-shifted fluorescence from polyguanylic acid in aqueous solution at room temperature, 211
Protoporphyrin IX
pharmacokinetics of 5-aminolevulinic-acid-induced porphyrins in tumour-bearing mice, 13
PSII
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87
Purpurins
purpurins and benzochlorins as sensitizers for photodynamic therapy, 109

Recombinant
chromophore–protein interaction controls the complexity of the phytochrome photocycle, 73
Red light
increase in cytosolic and mitochondrial protein synthesis in rat hepatocytes irradiated in vitro by He–Ne laser, 197
Reflectance
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Respiration
selective photosensitization of mitochondria by the lipophilic cationic porphyrin POR10, 191
Retinal
fluorescence properties of protonated and unprotonated Schiff bases of retinal at room temperature, 39
Rose bengal photo-oxygenation
kinetic aspects of the rose bengal-sensitized photo-oxygenation of tryptophan alkyl esters. Ground state and photopromoted dye–tryptophan derivative interactions, 79

Species
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
Stress
photosynthesis and hydrogen evolution under stress conditions in a CO_2-tolerant marine green alga, *Chlorococcum littorale*, 59
Stroma lamellae
differences in UV-B sensitivity between PSII from grana lamellae and stroma lamellae, 35
Sunlight
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21
Sunlight simulator
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21

Target theory
sensitization of photohemolysis by hypericin and Photofrin, 169
Tetramethylfuroquinolinone
photobiological properties of a new tetramethylfuroquinolinone, 159
Therapeutics
phototoxicity of argon laser irradiation on biofilms of *Porphyromonas* and *Prevotella* species, 123
Thermoluminescence
stabilization of oxygen evolution and primary electron transport reactions in photosystem II against heat stress with glycinebetaine and sucrose, 149
Time-gated fluorescence
microspectrofluorometry, fluorescence imaging and confocal microscopy of an endogenous pigment of the marine ciliate *Fabrea salina*, 183
Time-resolved reflectance
in vivo absorption spectrum of disulphonated aluminium phthalocyanine in a murine tumour model, 229
Transgenic potato
phytochrome states in transgenic potato plants with altered phytochrome A levels, 137
Tryptophan
kinetic aspects of the rose bengal-sensitized photo-oxygenation of tryptophan alkyl esters. Ground state and photopromoted dye–tryptophan derivative interactions, 79
Tryptophan alkyl esters
kinetic aspects of the rose bengal-sensitized photo-oxygenation of tryptophan alkyl esters. Ground state and photopromoted dye–tryptophan derivative interactions, 79

Unprotonated Schiff base
fluorescence properties of protonated and unprotonated Schiff bases of retinal at room temperature, 39
Urocanic acid
evidence that certain phototoxic drugs photosensitize urocanic acid isomerization, 63
UV-A radiation
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21
UV-B radiation
effects of UV radiation on photosynthesis of phytoplankton exposed to solar simulator light, 21
UV-B Sensitivity
differences in UV-B sensitivity between PSII from grana lamellae and stroma lamellae, 35

Visible light
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129

Xanthophyll cycle
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87

Yeast cells
the role of membrane-bound porphyrin-type compound as endogenous sensitizer in photodynamic damage to yeast plasma membranes, 129

Zeaxanthin
photosynthesis, chlorophyll fluorescence, light-harvesting system and photoinhibition resistance of a zeaxanthin-accumulating mutant of *Arabidopsis thaliana*, 87
